

re: regulatory review of their broadband pricing to independent ISPs

I greatly value the service and support from my local ISP and hope that you keep their interest and mine in mind while considering this petition which is sure to damage their operations. Bear in mind that the "big guy" always winds up squashing the "little guy" and it's actions just like this that let it happen.

Please deny Bellsouth's petition and ensure access for all companies, not just the Big Guys.
